The way we work has changed. The days of the process worker doing one task at one desk are gone. The days of the knowledge worker have arrived and are here to stay. Working on a diverse range of tasks throughout the day, from focused individual work through to open collaborative work and everything in between. Technology has advanced to the point where people are connected everywhere they go. The ability to check a work email from home or have a business meeting with someone on the other side of the world provides great possibilities for the future of work. So shouldn't our office environments reflect this?

MotionOffice® is about providing the workplace with a family of products to better suit the diverse range of tasks that workers of today are facing. It's about empowering employees to choose a space that will work for them. This could be a private work pod to complete a high focus task, a team workspace to provide training to your staff, or an open collaborative area to build stronger working relationships. Designed with flexibility and customisation in mind, MotionOffice® can provide a range of spaces with our system of office furniture. Because no two workplaces are the same.

motionoffice®

Range of Spaces

Throughout a normal working day a number of diverse tasks are undertaken. Tasks range from High to Low Focus and from Individual to Collaborative. Our furniture provides workers with a range of effective environments to match each unique task.

MotionOffice® Settings

Individual

MotionOffice® individual work spaces provide effective settings to complete high focus individual tasks. A range of creative layouts are available to suit differing space and privacy requirements.

Shell

Motion Shell work pods provide a very high level of acoustic and visual privacy, allowing workers to complete focused individual tasks in a comfortable enclosed environment.

Zip

Motion Zip work pods provide a high level of acoustic and visual privacy, allowing workers to complete focused individual tasks in a comfortable environment.

Wave

Motion Wave work pods provide a good touch down space for individual tasks. They are very space efficient, providing a small amount of acoustic and visual privacy for workers.

Link

Motion Link freestanding phone booths provide workers with a private acoustic space to make phone/video calls. A standing height tabletop provides space for laptops or notebooks if necessary. Link is designed to keep noise from the outside out, while also enclosing the user to prevent them from distracting others in the workplace.

MotionOffice® Settings

Collaborative

These collaborative work spaces are designed to provide a focused area to complete group tasks effectively. Barriers provide acoustic and visual separation and privacy from other workers.

Meeting

Motion Meeting is a four seater booth which provides a high level of privacy for users. This enclosed setting is ideal for anything from focused brainstorming sessions to client meet and greets.

Grandstand

Motion Grandstand provides tiered seating for anything from quick meetings and presentations to relaxation. Available in the full Motion Felt range, the Grandstand modules can provide visual interest to any space.

Arc

Motion Arc provides space for people to collaborate together, and comes with the option of additional privacy walls to enclose the space and provide a high level of privacy for workers.

Disc

Motion Discs are perfect for open spaces, providing comfortable individual seating spaces in a 360° range.

Expo

Motion Expo is ideal for workplace presentations, providing two defined tiers for workers to gather around. The walls provide some acoustic privacy and help to define the area for its use. The bar learner height desks provide space for laptops or notebooks as required.

MotionOffice® Settings

Flexible

Our range of soft seating provides areas for people to socialise or complete short mobile tasks in a relaxed environment. These products can be positioned to direct flow or add interest to an open plan area.

Wing

Motion Wing seating can be arranged to create meeting spaces or be used as quiet spaces to complete short individual tasks. The acoustic wings provide acoustic privacy with a more unique bold aesthetic.

Canopy

Motion Canopy seating can be arranged to create meeting spaces or be used as quiet spaces to complete short individual tasks. The large acoustic panels and roof provide a very good level of privacy in the busy work environment.

Fin

Motion Fin seating can be arranged to create open meeting areas or be used as spaces to complete short individual tasks. The low back creates an open welcoming environment for workers to relax as well.

Tables

Motion Tables are designed to compliment Loop seating items by referencing the same aesthetic, replace a Loop with a table to add interest and storage space. The Tablet Table is designed to fit alongside the entire MotionOffice range. Ideal for using a laptop or notebook, and Coffee Tables provide a large surface area, creating space for staff to gather around and share ideas.

Global
pharmaceutical

Otto

Motion Otto is the smallest member of the MotionOffice family. Castors on the base provide a mobile option to create clusters or add seating to any desired area.

MotionOffice® Settings

Custom

MotionOffice® system is designed with customisation in mind, we offer a range of colours providing a unique finish to suit any client needs. There are a range of power and data options available to provide connectivity for your workforce.

Motion Felt

Available in 10 colours our Motion Felt is designed for heavy commercial use (100,000+ martindale rubs) and provides excellent sound absorption.
